CAREER OBJECTIVE

Data Science student and Digital Explorers Scholar specializing in Statistical Analysis and Data Storytelling. Expert at using SQL and Python to extract impactful insights from large datasets. Currently based in Tallinn; focused on leveraging transparent data models to solve complex financial problems and improve customer outcomes.

EDUCATION

Tallinn University | *Exchange Scholar: Interactive Design & Storytelling* Feb 2026 – Present
Strathmore University | *BSc. Business Information Technology (First Class Hons Expected)* Sep 2022 – Aug 2026
Focus: Database Systems, AI, Complexity Analysis, and Human-Computer Interaction.

PROFESSIONAL EXPERIENCE

Old Mutual (Comparable to LHV) | *Data Analytics & BI Intern* Jan 2025 – Apr 2025

- Utilized **SQL and Python** to automate Business Intelligence reporting, transforming raw infrastructure data into actionable narratives for executive decision-making.
- Engineered real-time monitoring tools to ensure 99.9% data integrity, focusing on providing stakeholders with transparent, high-fidelity metrics.
- Optimized data retrieval patterns for large-scale financial logs, reducing reporting latency from days to real-time.

Institute of Baltic Studies | *Software Engineering Intern* Feb 2026 – Present

- Developing a secure system for the **Estonian Ministry of Justice**; architecting structured database schemas to ensure the integrity of digitized legal datasets.
- Collaborating with multidisciplinary teams to define data validation protocols for high-stakes governmental resources.

ANALYTICAL PROJECTS

Fraud Detection & Data Visualization Product

- Built a predictive pipeline with **92% accuracy** using XGBoost and Scikit-learn.
- Developed an **Explainable AI (XAI) Dashboard** to visualize model logic, ensuring that automated flags for irregularities remained transparent and auditable for human stakeholders.

Digital Explorers Hackathon | *Data Lead (Top 4 Award)*

- Led a team to launch a digital "Roadmap to Estonia"; used data visualization to track and improve user engagement metrics by 30% during the prototype phase.

TECHNICAL SKILLS & HONORS

Analytics: SQL (PostgreSQL/MySQL), Python (Pandas/NumPy), R, Data Visualization (Matplotlib, Seaborn)
Tools: Git, Docker, GitHub Actions, Flask, React, RESTful API Design
Soft Skills: Proactive Problem Solving, Cross-functional Collaboration, Ethical Data Handling
Honors: Digital Explorers II Scholar (Selected from top 1% of international talent); Dean's List (2023–2025).
